What is a 100 kW solar power inverter?

This solar power inverter with low frequency 50Hz/ 60Hz, 100kW high power output rating, no battery storage system, transforms 480V DC to 400V/ 460V AC (input and output voltage are customizable), high efficiency and stable performance. 100 kW off grid pv inverter is widely used in CNC machine, emergency car and compressor.

What is off grid PV inverter?

Off grid pv inverter is designed to withstand a variety of environmental conditions and provide reliable performance over time. Two kinds of start modes: Step-down voltage start and variable frequency start. Customers can set start mode according to the type of their load. The output voltage can be set between -40 % to +20 % of the rated voltage.

Why should a 100kW off grid power inverter be black?

This results in better cooling and a longer lifespan for the 100kW off grid power inverter. The black finish can improve the overall appearance of the inverter and make it blend more seamlessly with other components. A powerful cooling system enhances the safety, durability.

How to choose a solar inverter?

Pay attention to the hot surface of the solar inverter. For example, a heat sink of a power semiconductor or the like maintains a relatively high temperature for a period of time after the inverter is powered off.
