

100mm long cylindrical lithium iron phosphate battery

Overview

What are lithium iron phosphate (LiFePO₄) batteries?

Lithium iron phosphate (LiFePO₄) batteries are known for their high safety, long cycle life, and excellent thermal stability. They come in three main cell types: cylindrical, prismatic, and pouch. Each of these types has distinct characteristics that make them suitable for various applications.

Who makes the safest lithium iron phosphate (LiFePO₄) battery pack?

Keheng, as an LPF Battery Cell manufacturer, produces the safest Lithium Iron Phosphate (LiFePO₄) battery packs, which is the optimal solution for energy storage, power, medical, industrial, and commercial applications with its high safety, long cycle life, and no memory effect.

What are the different types of lithium phosphate batteries?

1. Cylindrical LiFePO₄ Cells Cylindrical LiFePO₄ cells are the most commonly used type of lithium iron phosphate batteries. They resemble the shape of traditional AA or AAA batteries and are widely employed in applications where high power and durability are essential.

What is a cylindrical lithium ion battery?

Cylindrical cells one of the most widely used lithium ion battery shapes due to ease to use and good mechanical stability. The tubular cylindrical shape can withstand high internal pressures without collapsing. Melasta produces multiple sizes and capacities according to the customer requirement.
