

10MWh Energy Storage Container in the Mountains of Dominica

Overview

What is the Dominican energy project?

This project is designed to support the Commonwealth of Dominica in developing and integrating clean, sustainable and low-cost energy. Through this \$38.5 million project, a new robust transmission network will be built to withstand natural hazards, strengthening Dominica's electricity grid.

How is Dominica transforming geothermal energy?

"Dominica is making significant strides in geothermal energy, with innovative investments to deliver clean, low-cost electricity to its citizens and thereafter, the Eastern Caribbean. With support from the World Bank and the Government of Canada, we are building a resilient network for geothermal energy transmission.

What is Dominica geothermal risk mitigation project?

The World Bank's ongoing Dominica Geothermal Risk Mitigation Project is supporting the development of the first geothermal power plant through drilling of new geothermal wells, critical for plant viability and increasing its capacity. The project will also oversee technical studies.

Why is Dominica struggling with electricity?

Dominica's electricity sector is currently challenged by outdated infrastructure, largely dependent on aging diesel generators which result in high electricity expenses and an unreliable power supply, hampering the country's competitiveness.
