120kW Foldable Container Used in French Ports

Overview

What is the largest container terminal in France?

The largest container terminal in France: the Terminal de la Méditerranée with a capacity of 1.5 million TEU operated by Eurofos/Ports Synergie. New generation equipment with the largest gantry cranes in the world and hybrid straddle carriers. Mobile scanner to check containers.

What are the shipping ports in France?

This is among the shipping ports in France for both cargo and passenger ships. It has three separate terminals and a range of services, including container handling, warehousing and storage, and transshipment.

What is a foldable cargo container?

A foldable cargo container looks like a traditional container, but it offers the opportunity of saving space when it's not being used. This type of container can be folded vertically and horizontally with the port's standard machinery and, of course, handled with container spreaders. Why do we need to save space in shipping cargo?

Why are foldable containers so popular?

Only about 33% of container ships globally arrive on time at ports. The delays make container management difficult, so congested terminals are common. Limited space in ports stimulates innovation. Thus, foldable containers were born. Cargo containers have been in common use since the second half of the 20th century.

What Are Foldable Containers For Shipping Cargo?

Enter The Foldable ContainerHow Does A Foldable Container Work?The Downside of Foldable ContainersWhile the containers from HCI are of the collapsible type, those from Staxxon fold vertically, in the company's words 'accordion style'. To fold an HCI container, an MHE would lift the roof of the container, and then the sides are folded inward. The roof is then lowered gently to rest on the folded sides creating a kind of horizontal flat-pack. Fou See more on marineinsight ZggShip
