

# **1MW Solar-Powered Containerized Equipment Used in Hanoi Farms**

## Overview

---

How much land does Vietnam need to build a solar power plant?

Most farmers in Vietnam have less than 1 ha (or 2.4 acres) of land, meaning that solar developers need to negotiate with multiple local farmers to build large-scale power plants.

Does Vietnam need solar power?

Vietnam is rapidly increasing its reliance on solar power, with plans to generate 16% of its energy from solar by 2030. This shift is driven by significant investments in solar farms across the country. Vietnam is making significant strides in its renewable energy sector, focusing on solar power as a key component of its energy strategy.

Does Vietnam have a solar energy strategy?

Vietnam is making significant strides in its renewable energy sector, focusing on solar power as a key component of its energy strategy. By 2030, the country aims to generate 16% of its energy from solar, driven by substantial investments in solar farms across the nation.

How many MW solar power capacity will Vietnam have?

In May 2019, the Electricity of Vietnam announced the grid-connection of 20.5 MW solar power capacity as phase one of an envisaged 47.5 MW FPV plant [ 60 ].
