

1MW Vietnamese energy storage container for agricultural irrigation

Overview

How can small-scale agrivoltaics help farmers in Vietnam?

Small-scale agrivoltaics done off-grid can address declining incomes faced by farmers across Vietnam by providing them with localized energy systems that cut the costs of diesel for farm activities.

Can agrivoltaics improve food production in Vietnam?

However, much of Vietnam's most productive solar potential overlaps with agricultural land. Agrivoltaics, which integrate solar energy production on agricultural land while allowing for simultaneous crop production, present a unique solution to land tensions between rapid renewable energy expansion and food production.

What is a containerised energy storage system (BESS)?

Our containerised energy storage system (BESS) is the perfect solution for large-scale energy storage projects. The energy storage containers can be used in the integration of various storage technologies and for different purposes. For installation manual, technical datasheet, inverter adjustment/testing or configuration, please send us inquiry.

How much land does Vietnam need to build a solar power plant?

Most farmers in Vietnam have less than 1 ha (or 2.4 acres) of land, meaning that solar developers need to negotiate with multiple local farmers to build large-scale power plants.
