

215v three-phase inverter

Overview

What is a 3 phase solar inverter?

Three-phase On-grid Inverter 215kW, Huawei SUN2000-215KTL-H3 The Huawei SUN2000-215KTL-H3 three-phase inverter is specifically designed to optimize and convert solar energy in high-capacity systems. With a nominal power of 215 kW, this inverter incorporates advanced technologies to ensure efficiency and durability.

What is a Huawei sun2000 215ktl-h3 solar inverter?

The Huawei SUN2000-215KTL-H3 three-phase on-grid inverter is a high-performance solution for efficiently converting solar energy into electric power, suitable for large solar systems. Designed to meet high energy demands, this inverter supports up to 215,000 watts of power, making it suitable for large-scale industrial and commercial applications.

Which inverter is best for a photovoltaic installation?

These inverters have a fuse-free design and feature type 2 AC and DC surge arresters. They also feature String Fault Monitoring and residual current monitoring. Huawei SUN2000 215 KTL - H0 e H3: three-phase inverter for utility-scale photovoltaic installations. Choose the model that best suits your needs.

How much power does a solar inverter have?

With a nominal power of 215 kW, this inverter incorporates advanced technologies to ensure efficiency and durability. Featuring three independent MPPT controllers and a European efficiency of 98.60%, this model is ideal for large industrial solar installations, ensuring efficient management even under varying lighting conditions.
