

# **350kW Solar-Powered Container for Wastewater Treatment Plants**

## Overview

---

What is the difference between solar energy and wastewater treatment plant?

The solar Energy faces the drawback to treat wastewater only during day time, whereas wastewater treatment plants are underperformed during night. Need for energy storage systems increases the overall cost of the WWT plant.

Are solar photocatalytic wastewater treatment plants environmentally friendly?

There do exist very few medium scale solar photocatalytic wastewater treatment plants which are environment friendly compared to the existing conventional systems. Treatment of wastewater using solar energy reduces the use of conventional power thereby reduces emission of GHG.

Can solar energy be used for wastewater treatment?

Recent trends on wastewater treatment using solar energy were reviewed. Solar photocatalysis methods of wastewater treatment was studied and analysed. Advanced oxidation methods using solar energy are found to be effective. Technical limitations and environmental benefits are discussed.

How much energy does a wastewater treatment plant use?

The study conducted by (Guernanou, 2019) evaluated an energy consumption of 0.6 kWh/m<sup>3</sup> which emitted 185.61 g of equivalent CO<sub>2</sub> /kWh for wastewater treatment. The direct and indirect ways of GHG emission from a WWT are highlighted in Table 2.
