

60v inverter to 72 voltage

Overview

Can a 12V 72V inverter be converted to each other?

A1: No, 12V~72V cannot be converted to each other. You can only choose one of the input voltages, and the inverter input voltage must be consistent with the system input voltage. For example: a 72V inverter can only be used for a 72V battery. Q2: How to select the output voltage:.

When does the inverter output voltage go into error 72?

At that point the inverter output voltage starts getting less stable (jumps between 238 and 220) until it goes into error 72. The time this usually happens for me is at the end of the day 16:45 when my PV generation starts to match my load (+-400W) for about 10 - 15mins. During that time I have risk of getting error 72.

What is a car inverter converter?

□Anti-interference Pure Sine Wave Inverter□The car inverter converter adopts pure sine wave technology, which has low interference, low noise and large load capacity, it is a voltage converter that converts 12V / 24V / 48V / 60V / 72V DC into 110V/120V/220V/230V/240V AC. It can be used in emergencies, camping, cars, homes, RVs and solar energy.

Do I need to select the output voltage for my inverter?

A2: The output voltage is the US standard voltage 110V~120V (default). You do not need to select the output voltage, only select the input voltage. Of course, if you need an inverter with an output voltage of 220V, please let us know by email.
