

A solar power plant in Cambodia

Overview

Is solar energy a good source of energy in Cambodia?

Solar energy in Cambodia is the country's second most promising clean energy source behind hydropower. Hydropower remains Cambodia's most developed renewable energy source but also has its own challenges – such as yearly variability due to droughts and floods.

How many solar farms are there in Cambodia?

Cambodia generates solar-powered energy from 3 solar power plants across the country. In total, these solar power plants has a capacity of 22.8 MW. How much electricity is generated from solar farms each year?

.

Why is Cambodia building new energy plant projects?

The government is boosting building new energy plant projects to generate clean energy for the grid, said Keo Rattanak, Minister of Mines and Energy. The projects will increase Cambodia's share of clean energy generation capacity to 70 percent by 2030 from more than 62 percent at present, Rattanak said.

How many energy projects are coming to Cambodia?

The Cambodian Cabinet approved four energy projects this past April, a US\$231 million hydroelectric power and three solar power projects with a combined, rated, maximum power capacity of 140 MW. The latter are expected to come online and dispatch power to the national grid by 2020 and 2021 in four different provinces.
