## Overview

---

What is a greenhouse integrated PV (gipv) module?

Get in touch! Traditional greenhouses rely on external fossil fuel derived energy sources to power lighting, heating and forced cooling. Specially designed BiPV solar glass modules for greenhouses, Heliene's Greenhouse Integrated PV (GiPV) modules offer a sustainable alternative with no additional racking or support required.

Does AGC offer smart glass in Asia?

AGC offers a variety of smart glass in Asia. Our SunEwat energy generating glass solutions transform everyday building materials into power sources. By integrating photovoltaic technology into architectural elements like windows and facades, AGC enables the creation of energy-positive structures that generate clean electricity.

Which glass is best for green energy design?

Cells can be single or bifacial for flexible green energy designs. This photovoltaic-embedded BIPV glass offers a uniform black layer, ideal for opaque cladding and spandrels in energy-generating designs. SunEwat Colour's energy-generating glass with customisable colour options is perfect for unique and sustainable facades.

How big is the greenhouse horticulture market?

The blooming greenhouse horticulture market is expected to reach \$50 billion by 2028. At the same time, energy costs, grid constraints and public policy are fueling growth in on-site solar generation. Ready to go green and grow more with Heliene's agrivoltaic modules?
