

Albania new UPS uninterruptible power supply agent

Overview

How do I Choose an uninterruptible power supply for DC applications?

Our uninterruptible power supplies for DC applications provide reliable protection against supply interruptions. Select the appropriate DC UPS for your application. Our uninterruptible power supplies for AC applications provide a pure sine curve at the output. Select the ideal AC UPS and ensure superior system availability.

Why should you choose Phoenix Contact uninterruptible power supplies?

Ensure superior system availability with our power supply systems. Find out about power supplies, DC/DC converters, redundancy modules, and uninterruptible power supplies for various requirements and industries. Phoenix Contact uninterruptible power supplies for AC and DC applications provide reliable protection against supply interruptions.

Why do you need an UPS system?

A UPS supplies power even in the event of mains failure and protects your system against supply interruptions. We offer UPS solutions for DC and AC applications where the functionality and design are optimally tailored to the requirements of various different industries.

How to choose an AC UPS system?

Select the ideal AC UPS and ensure superior system availability. Configure your UPS system with the maintenance-free buffer modules. Protect your application and also bridge short failure times lasting up to 30 seconds. The buffer module stores the energy required to bridge mains failures in maintenance-free capacitors.
