## Overview

---

Who are the top 10 Bess manufacturers in Canada?

This paper will introduce the top 10 BESS manufacturers in Canada including TERIC Power, Northland Power, TransAlta, EVLO, Hecate Energy, Discover Battery, AltaStream, Westbridge Renewable Energy, Moment Energy, Huntkey, explore how they are leading the energy storage industry through innovative technology and service excellence.

What is Canadian Solar E-storage?

Canadian Solar's e-Storage has secured a contract from Nova Scotia Power to develop the first grid-scale battery energy storage projects across three locations in Nova Scotia, Canada.

What is a battery energy storage system (BESS)?

This stored heat is then used to reheat the air before it enters the turbine where no additional fuel combustion is required. 9 As of June 2025, the Goderich A-CAES Facility in Goderich, Ontario is the only CAES project in Canada, able to store 1.75 MW. 10 Battery Energy Storage Systems (BESS) are tools that store electrical energy.

What types of energy storage are available in Canada?

There are three main types of energy storage currently commercially available in Canada: Storage is playing an increasingly important role in the electricity system by improving grid reliability and power quality, and by complementing variable renewable energy sources (VRES) like wind and solar.
