

Base station power supply not included

Overview

How much power does a base station need?

There is no general maximum output power requirement for base stations. As mentioned in the discussion of base-station classes above, there is, however, a maximum power limit of 24 dBm output power for Local Area base stations and of 20 dBm for Home base stations, counting the power over all antennas.

Can I use the c39280-z4-c707 power supply for my base station?

If you can find the term "C39280-Z4-C707" (s. 2nd image) there, you will be able to use this power supply for your base station. This power supply is compatible with all Gigaset base stations without answering machine. In a few exceptional cases, the power supply can also be used for Gigaset base stations with answering machine.

Is the power supply compatible with all Gigaset base stations without answering machine?

This power supply is compatible with all Gigaset base stations without answering machine. In a few exceptional cases, the power supply can also be used for Gigaset base stations with answering machine. Please check the back or bottom of your base station for compatibility.

Base station power supply not included
