

Battery cabinet communication high voltage control part

Overview

The bus cabinet serves as the DC-side bus control unit of the energy storage battery system, connecting the high-voltage box and the storage converter. What is a high-voltage battery management system (BMS)?

These components collectively form the high-voltage part of a BMS, enabling precise monitoring, control, and protection of the high-voltage battery pack in applications like electric vehicles or large-scale energy storage systems.

Why do I need a high-voltage box / PCS/ups / EMS?

These enable seamless communication with the high-voltage box, PCS/UPS, or EMS, supporting data exchange and control for the energy storage battery management system while ensuring robust system protection. Email us with any questions or inquiries or use our contact data.

What is a Marquardt high voltage box?

The Marquardt High Voltage (HV) Box is a self-contained Battery Management System (BMS) designed to optimize battery performance and safety. With advanced, high-quality components, rugged durability and compact size, it's what you want to drive your next EV project.

What is a bus cabinet?

The bus cabinet serves as the DC-side bus control unit of the energy storage battery system, connecting the high-voltage box and the storage converter. It integrates the power pool system (stack), optional fuses or circuit breakers, a three-level Battery Management System (BMS/ESMU), and a UPS power supply.
