

# **Battery cabinet communication high voltage module**

## Overview

---

Can a central controller be used for high-capacity battery rack applications?

These features make this reference design applicable for a central controller of high-capacity battery rack applications. Currently, a battery energy storage system (BESS) plays an important role in residential, commercial and industrial, grid energy storage and management. BESS has various high-voltage system structures.

Why do I need a high-voltage box / PCs/ups / EMS?

These enable seamless communication with the high-voltage box, PCS/UPS, or EMS, supporting data exchange and control for the energy storage battery management system while ensuring robust system protection. Email us with any questions or inquiries or use our contact data.

What is bsm48106h battery management system?

The BSM48106H features a three-level Battery Management System (BMS) that monitors and manages critical cell information, including voltage, current, and temperature. Additionally, the BMS balances charging and discharging processes to enhance cycle life.

Can a battery cabinet be deployed outside a smart module?

Battery cabinets or racks can also be deployed outside smart module A (batteries deployed outside) or smart module B. The front door is a single door, and the rear door is a double one. Shoto batteries are supported.
