What is an uninterruptible power supply (UPS)?

A solid Uninterruptible Power Supply (UPS) can be a real lifesaver, keeping everything running smoothly when the lights go out. We've done some digging into the top picks, backed by data and expert review.

What is an uninterruptible power system?

As a whole, Uninterruptible Power Systems are vital for ensuring your equipment remains powered during outages or disruptions. Understanding the differences between online, offline, and line-interactive UPS systems will help you choose the right one for your needs. Offline UPS: Great for home use and low-demand devices.

Do you need an ups?

Recommendations for improved reliability In traditional power designs, you may have one UPS supporting your servers, switches and storage devices. In this type of environment, you are prone to having to shut down your equipment during a power failure, UPS maintenance or UPS replacement.

Is a ups a primary surge protection device?

A UPS delivers second-level protection against surges; it should never be considered a primary surge protection device. It also continually regulates incoming voltage and provides an internal battery that allows connected equipment to continue running even if the power supply is cut.
