

MODERNIZATION SOLAR

**Bring an outdoor power source  
to charge at work**

## Overview

---

Faced with a variety of charging interfaces, voltage standards, and power output options, understanding the advantages and disadvantages of various outdoor charging methods —such as solar charging, car charging, portable power stations, and DC/AC inverters —can help you choose the most suitable and reliable off-grid power solution. How do you run power outdoors?

Mr. Electric outlines the safest methods for running power outdoors. Plan your route and power needs. Use weatherproof, outdoor-rated conduit and wiring. Dig trenches for underground cables, following local codes. Install GFCI outlets for safety. Test the system before use. Test the system before use. Looking to 'amp up' your outdoor experience?

Do I need a GFCI outlet if I run power outside?

When running power outside, a GFCI-equipped outlet ensures safety, and is required by code in all areas exposed to moisture, like the outdoors. When adding an outdoor outlet, be sure to choose an outdoor-rated, weatherproof model with built-in, high-sensitivity GFCI.

Do I need a permanent power solution?

For lighting, lawn tools used on the regular, or outbuilding power needs, you need a permanent power solution for safety, whether that involve an outdoor outlet addition to your home's main structure, or wiring run remotely to an outbuilding. For lines not off the house, cable must be wired to a separate GFCI indoors.

How do I Choose an outdoor outlet?

When adding an outdoor outlet, be sure to choose an outdoor-rated, weatherproof model with built-in, high-sensitivity GFCI. Whether single or duplex, all exterior outlets should have spring-loaded covers to protect them from weather, pests, dirt, and most importantly moisture.

Short-Term Power Supply  
Essential Outdoor Extension Cord Safety  
Safely Installing Long-Term Power Solutions  
Installing A GFCI Outlet Outside  
Placing The Outlet  
When adding an outdoor outlet, look for a conveniently located indoor outlet to connect to with the wiring. Drill a hole through the house wall and feed the wiring in close to the indoor outlet. Fit the mounting box for the outdoor outlet over that hole. Draw in the wiring and connect it to the outlet terminals, then put the face plate on the box. See more on mrelectric Enphase
