

MODERNIZATION SOLAR

British container generator manufacturers

Overview

What is a containerised diesel generator?

A containerised diesel generator is a complete power unit housed in a modified ISO shipping container, offering long runtimes, noise control, and protection from the elements. These generators are ideal for remote sites, industrial operations, and export use, where durability and mobility are essential.

What can containerising generators do for You?

These bespoke solutions include noise reduction systems for traditional generators, accommodating twin sets within a single container, and rental-ready designs. Containerising generators allows us to deliver a broader range of innovative and flexible power solutions. Enhanced Durability: Optional C4 paint finish for tough environments.

What is a BS 7671 container generator?

All wiring is designed to meet BS 7671 standards, ensuring compliance and reliability. These containers house generators in popular sizes such as 800kVA, 1000kVA, 1250kVA, 1500kVA, and up to 3000kVA — available in 20ft, 40ft, and 45ft formats, tailored to your specific requirements. Contact us today to discuss your requirements.

What is a diesel generator?

Diesel generators are those that are run on diesel, and can typically be divided into two basic parts: a diesel engine and an electrical generator. Diesel generators can be used to provide power to places that are not powered by a power grid or can be used as a backup in case of a power outage.
