

British power signal tower base station

Overview

What is Battersea Power Station?

London's Battersea Power Station seen across a variety of British rail lines. An iconic landmark, Battersea Power Station is a Grade II* listed building that once supplied one fifth of London's electricity. Battersea Power Station and its chimneys have been an iconic part of the London skyline since their construction between 1929 and 1955.

Who built Battersea Power Station?

Battersea Power Station and its chimneys have been an iconic part of the London skyline since their construction between 1929 and 1955. The complex was the collaboration between renowned London architects J. Theo Halliday and Sir Giles Gilbert Scott, the latter also being the creator of the city's iconic red telephone boxes.

What is the British power signalling Register?

The British Power Signalling Register represents a condensation of many decades of recording and research by a large number of signalling enthusiasts and industry professionals, and has been fully peer-reviewed by signalling historians and signalling engineers.

How much power does London's B station generate?

The construction of the B Station brought the site's generating capacity up to 509 megawatts (MW), making it the third largest generating site in the UK at the time, providing a fifth of London's electricity needs (with the remainder supplied by 28 smaller stations).
