What is a battery monitoring system (BMS)?

BMS performs several functions, including monitoring the battery's state of charge, state of health, and state of safety. The design and operation of BMS are critical in ensuring the safety and efficiency of EV batteries.

How does a battery management system (BMS) work?

BMS operates in several modes, including charging mode, discharging mode, and idle mode. In charging mode, the BCU regulates the charging of the battery pack, ensuring that it charges within the optimal range. In discharging mode, the BCU controls the discharge of the battery pack, ensuring that it operates within the safe limit.
