

Cairo outdoor wind power base station enterprise ranking

Overview

Is ENGIE building a wind farm in Egypt?

In Egypt, ENGIE is currently building Red Sea Wind Energy, the future largest onshore wind farm of Africa, within budget and ahead of schedule.

What are the wind energy conditions in Egypt?

Egypt has outstanding wind energy conditions, particularly in the coastal regions where high and stable wind speeds are frequent, with an average of up to 10.5 m/s in the Gulf of Suez. The country's large deserts and abundant thinly populated areas are well suited for the construction of large wind farms.

How many MW of wind will Egypt build in 2020?

The Egyptian Supreme Council of Energy approved a plan to build 7 200 MW of wind capacity in 2020, installed at a rate of 600 MW per year. The private sector is targeted to play a key role in achieving this goal.

Can Egypt reach 42% of renewable electricity by 2030?

A challenge taken up by the teams. Onshore wind power represents a significant lever in the Egyptian government's ambition of reaching 42% of renewable electricity in the country by 2030. In regions like the Gulf of Suez, wind speeds exceed 9 meters per second*, ideal conditions for the development of large-scale wind farms.
