# Charging battery panel container base station

## Overview

---

CIMC Yangzhou Base Battery Swapping Station/New Energy Vehicle Containerized Power Station consists of several container modules, suitable with various brand new energy cars and battery systems.

What is CIMC Yangzhou base battery swapping station/new energy vehicle containerized power station?

CIMC Yangzhou Base Battery Swapping Station/New Energy Vehicle Containerized Power Station consists of several container modules, suitable with various brand new energy cars and battery systems, integrated with battery storage, battery charging, car moving, and internet communication system.

What is battery swapping station?

Battery Swapping Station is an energy station that provides charging and quick replacement of power batteries for electric vehicles. Power change mode has a natural advantage over the traditional charging mode.

What is a containerised energy storage system (BESS)?

Our containerised energy storage system (BESS) is the perfect solution for large-scale energy storage projects. The energy storage containers can be used in the integration of various storage technologies and for different purposes. For installation manual, technical datasheet, inverter adjustment/testing or configuration, please send us inquiry.

How do you store a battery?

To support them all and keep them off the floor so they don't cut into my valuable storage space, I built a hanging shelf for them. That's probably 180 pounds of batteries all together, so the shelf is made out of C-channel galvanized steel and hung from chains. Next came the air conditioning.
