

China-Africa Energy Storage Vanadium Battery Station

Overview

What is the capacity of the world's largest vanadium flow battery?

It has a capacity of 175 MW/700 MWh. On December 5, 2024, Rongke Power (RKP) completed the installation of the world's largest vanadium flow battery . With a capacity of 175 MW and 700 MWh, this innovative energy storage system, located in Ushi, China, sets a new standard in long-duration energy storage solutions.

What is happening with vanadium batteries in China?

Important developments related to the commercialization of vanadium batteries occurred in China in September. Construction commenced on China's first gigawatt-hour (GWh) vanadium flow power station in Qapqal Xibe, Xinjiang, with a total installed capacity of a million kilowatts (kW).

What is a giant solar-plus-vanadium redox flow battery project in Xinjiang?

A giant solar-plus-vanadium flow battery project in Xinjiang has completed construction, marking a milestone in China's pursuit of long-duration, utility-scale energy storage. China has completed the main construction works on the world's largest vanadium redox flow battery (VRFB) energy storage project.

Why is Rongke Power a global leader in vanadium flow batteries?

With this achievement, Rongke Power reaffirms its position as a global leader in vanadium flow battery technology. The project also serves as a model for future installations worldwide, proving that vanadium flow batteries are a viable option for large-scale energy management.
