

China portable power station in Ethiopia

Overview

What is China doing with Ethiopia?

Economic and technical cooperation between China and Ethiopia began as early as 1971, supported by a series of bilateral agreements on trade and development. Over the decades, China has financed and built a number of key infrastructure projects across Ethiopia, including highways, power stations, veterinary clinics, and water supply systems.

How can China contribute to Ethiopia's green energy transition?

Energy cooperation is another priority. Chinese investment is helping to develop Ethiopia's hydropower potential—most notably the Grand Ethiopian Renaissance Dam—alongside new ventures in solar, wind, and other renewables, contributing to Ethiopia's green energy transition.

How has China influenced Ethiopia?

Over the decades, China has financed and built a number of key infrastructure projects across Ethiopia, including highways, power stations, veterinary clinics, and water supply systems. This cooperation continues to deepen, providing a strong foundation for trade and investment.

How has Ethiopia benefited from a transnational electrified railway?

The Addis Ababa-Djibouti Railway, Africa's first transnational electrified railway, has significantly boosted Ethiopia's trade connectivity. Industrial parks such as the Eastern Industrial Park have become magnets for Chinese enterprises, accelerating local industrialization. Energy cooperation is another priority.
