## Overview

---

What is Container Technologies Industries, LLC?

Container Technologies Industries, LLC (CTI) is a metal fabricator dedicated to serving the Nuclear and Commercial Utilities Industries. It has been in business since December, 1999.

What is Envision's new energy storage system?

A company representative mentioned that in 2023, Envision set a new standard in energy density with its 20-foot container, 5 MWh battery energy storage system. The latest capacity breakthrough was made possible by the use of large-capacity cells, system integration, compact design, and further optimization within the container.

How much energy does a liquid-cooled container hold?

The latest generation product has an energy density of more than 440 Wh/l, a roundtrip efficiency of 96%, and a cycle lifetime of nearly 16,000 charge-discharge cycles. The liquid-cooled system has a voltage range from 1500 V - 2000 V and is configurable for storage durations of two to eight hours. The container weighs around 55 tons.

What is AI-powered energy storage & X?

At the EESA show, the company also launched its AI-powered “energy storage + X” solution for grid-scale battery storage systems capable of facilitating sizing and construction of projects as well as their operation, specifically their lifecycle services and trading in the electricity spot market.
