

# **Costa Rica Solar Container 200kWh**

## Overview

---

Can a warehouse use solar energy in Costa Rica?

Solar energy has become an increasingly popular option for a variety of sectors, and warehouses are no exception. In Costa Rica, with its abundant solar radiation, this renewable energy source offers a number of benefits that can transform the way your facility operates.

Can solar power diversify the energy mix in Costa Rica?

While hydroelectric power dominates the energy mix at approximately 80% of electricity production, solar energy, though currently a smaller contributor, holds significant potential to diversify and stabilize the grid. This paper investigates Costa Rica's renewable energy journey, emphasizing solar power's evolving role.

Is solar a viable energy source in Costa Rica?

Critically, the literature reveals gaps in solar-specific research for Costa Rica. While hydroelectric and geothermal energy dominate academic focus, solar remains underrepresented, despite its potential to address energy security and grid stability.

Who is the target market for solar energy in Costa Rica?

According to the Costa Rican Institute of Electricity (ICE) and the Costa Rican National Power and Light Company (CNFL), both government entities, the target market for solar energy in Costa Rica, remains to be households or companies that consume between 200kw/h and 3,000kw/h. ICE and CNFL have been installing photovoltaic systems.
