# Dili various downgraded solar panel prices

## Overview

---

How much are Chinese solar modules worth?

Prices for Chinese solar modules have reached record lows, according to the latest data from OPIS. The benchmark assessment for TOPCon modules from China has fallen to \$0.100 per watt, a decline of \$0.005 per watt compared to the previous week. Similarly, Mono PERC module prices have also dropped by \$0.005 per watt, now standing at \$0.090 per watt.

How much do Topcon solar modules cost in China?

The current tradable indications for TOPCon modules are being reported at \$0.10 per watt Free-on-Board (FOB) China. As the market struggles with low demand, these new record low prices highlight the ongoing challenges faced by Chinese solar module makers.

How much does Intersolar cost in China?

During Intersolar, market prices showed little movement, holding steady at around \$0.10 per watt Free-on-Board (FOB) China, with minor fluctuations of up to +/-0.3 cents. Observers noted that despite the onset of the high installation season, demand for utility-scale projects in Europe appears subdued this year.

What are the benefits of a decline in solar panel prices?

The decline in solar panel prices brings forth a myriad of benefits. From increased affordability of solar energy to job creation, reduced carbon emissions, and improved air quality, the plummeting prices have propelled the adoption of solar power, paving the way for a sustainable and greener future. Benefits of the Decline in Solar Panel Prices:
