

# **Does Finland have a base station for the communication project**

## Overview

---

Will Finland become a world leader in communications networks by 2025?

In 2019 the Ministry of Transport and Communications, responsible for the operation of transport and communications markets and critical communications networks, launched a digital infrastructure strategy with the goal of turning Finland into the world leader in communications networks by 2025.

How does Finland perform in digital technology integration?

Finland was the top performer in the integration of digital technologies, and more than 60 percent of enterprises in Finland buy sophisticated or intermediate cloud services. Finland scored more than 95 points (out of 100) in online availability and scored close to 100 in mobile friendliness.

Does Finland have a 6g network?

The advanced nature of the Finnish telecommunications market has led to many services and technologies introduced in Finland much earlier than elsewhere in the world. Finland was the first country to launch a broad 6G research program in 2018 and established the world's first 6G test network.

What is 5G test network Finland?

The 5G Test Network Finland (5GNTF) project, which comprises around 50 members from industry, academia, and the Finnish public sector, offers testing, trial and piloting services, and ample opportunities for collaboration within the ecosystem.
