

Does the Democratic Republic of the Congo need energy storage for solar power generation

Overview

Does the Democratic Republic of Congo have wind and solar power?

Photovoltaic (PV) and wind resources in the Democratic Republic of Congo. It presents some of the findings from a detailed technical assessment that evaluate solar and wind generation capacity to meet the country's pressing needs with quick wins. DRC has an abundance of wind and solar potential: 70 GW of solar and 15 GW of wind, for a total of 85 GW.

What is the electricity access rate in the Democratic Republic of Congo?

The public version of the resulting report of the effort is available [here](#). The Democratic Republic of Congo's national electricity access rate is estimated at 19%. Less than 1% of the rural population and 41% of the urban population has energy access. Of the country's 10 million households, only 1.6 million have access to electricity.

What is the government's vision for power generation in Congo?

The government's vision is to increase the service level to 32 percent by 2030. Lack of access to modern electricity services impairs the health, education, and income-generating potential of millions of Congolese people. Most power generation development is directed and funded by mining companies seeking to power their facilities.
