## Overview

---

What is a containerized wastewater treatment plant?

A containerized wastewater treatment plant is a wastewater treatment system that is fully integrated into a container. For uncomplicated and fast transportation, we use 10, 20 and 40-foot shipping containers in accordance with the international ISO standard for our KLARO container systems.

What is a containerized disaster rescue water system?

Containerized disaster rescue water systems provide essential sanitation quickly and efficiently, even in areas with limited space. Industrial wastewater treatment for on-site processing: SSI's containerized systems allow you to handle wastewater directly at the job site.

What is a containerized package plant?

Containerized Package Plants are a portable and efficient solution for water and wastewater treatment. They offer a plug-and-play option for remote locations, emergency response, or temporary needs, without compromising on treatment quality. These plants are designed to be potable and can be easily transported to new sites as necessary.

What is a containerized wastewater system?

**Rapid deployment:** Containerized systems are pre-assembled and ready to use upon arrival, perfect for disaster relief or temporary needs. Simply connect the system to the power and water supply, and it's operational.

**Scalable:** Multiple containers can be interconnected to handle larger wastewater volumes when needed.
