

East Timor solar container communication station Installation Project

Overview

What is East Timor electrification masterplan 2025?

The overall objective of this project is to develop, for the Government of East Timor, the Electrification Masterplan 2025 of East Timor based on Renewables Energies. The East Timor Renewable Energy Electrification Plan consists on the thorough analysis of wind, solar and hydro resources (including wind measurement stations installation).

What is the 'one port' project in East Timor?

Equally significant is the "One Port" project. The Tiba Port project, constructed by China Harbour, is located 10 kilometers west of the capital Dili. The main body of the port is a 630-meter-long dock, including a 7000 TEU berth and a 3500 TEU berth. It is the first modern international container freight terminal in East Timor's history.

What is East Timor State Grid?

The East Timor State Grid project, constructed and operated and maintained by CNNC 22, is the largest power infrastructure construction project in East Timor, including one national dispatch center, nine substations, 603 kilometers of high-voltage transmission lines, and 120 kilometers of medium voltage distribution lines.

Who bids for solar IPP project in Timor-Leste?

For Timor-Leste, bidders are typically from legacy countries such as Indonesia, Portugal and People's Republic of China. For the Solar IPP project, Government of Timor-Leste represented by the Ministry of Finance has provided backstop guarantee for EDTL obligations under the Implementation Agreement.
