# Energy storage container BMS communication high voltage box

## Overview

---

Why do I need a high-voltage box / PCs/ups / EMS?

These enable seamless communication with the high-voltage box, PCS/UPS, or EMS, supporting data exchange and control for the energy storage battery management system while ensuring robust system protection. Email us with any questions or inquiries or use our contact data.

What is bsm48106h battery management system?

The BSM48106H features a three-level Battery Management System (BMS) that monitors and manages critical cell information, including voltage, current, and temperature. Additionally, the BMS balances charging and discharging processes to enhance cycle life.

What is bsm48106h?

The BSM48106H is a high-voltage energy storage system based on advanced lithium iron phosphate (LiFePO4) battery technology. Developed and produced by Bluesun, it provides reliable power support for a wide range of equipment and systems.

What is a battery energy storage system?

Currently, a battery energy storage system (BESS) plays an important role in residential, commercial and industrial, grid energy storage and management. BESS has various high-voltage system structures. Commercial, industrial, and grid BESS contain several racks that each contain packs in a stack. A residential BESS contains one rack.
