

Estonia Energy and Chemical Small Container Station

Overview

What does the IEA say about Estonia?

The IEA commends Estonia for the steps it has taken to end all remaining energy trade with Russia while ensuring regional energy security, and for the work to accelerate the energy transition, including setting a 2050 carbon-neutrality target and a target for 100% of annual electricity demand to be covered by renewable energy by 2030.

Does Estonia use fossil fuels?

According to the Review by the International Energy Agency, Estonia's energy mix is dominated by fossil fuels, however the share of fossil fuels in total energy supply declined from 90% in 2010 to 68% in 2023. Figure 2. The production and consumption of fossil fuels in Estonia (coal – left, gas – in the center, oil – right).

Does Estonia use natural gas?

Natural gas plays a relatively minor role in Estonia's energy system and is used mostly for heating. In 2021, natural gas accounted for just 8.6% of total energy supply (versus the IEA average of 30%) and came mostly from Russia.

How is energy used in Estonia?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Estonia Energy and Chemical Small Container Station

Estonia

1 day ago · Although oil shale covers 70% of Estonia's energy demand and ensures the country's energy security, the government is seeking to ...

Energy policy

Oct 2, 2025 · Estonia has set itself the goal of establishing open and efficient energy markets where energy prices are determined by competition among multiple suppliers. To achieve this, ...

Energy sector in Estonia

Nov 7, 2025 · Estonia is an attractive market for energy companies, especially those specializing in renewable energy, energy storage solutions, and grid modernization. With the development ...

[Executive summary - Estonia 2023 - Analysis](#)

4 days ago · Estonia is also developing a methodology to calculate dynamic EPCs based on metered energy demand, exploiting the country's 100% coverage of smart meters. These ...

Estonia Energy Information

5 days ago · Estonia Total Energy Production & Consumption Total energy consumption per capita is about 3 toe/cap (2023), i.e. 9% above the EU ...

ESTONIA ENERGY STORAGE POWER STATION LITHIUM ...

Base station energy storage lithium iron battery
From a technical perspective, lithium iron phosphate batteries have long cycle life, fast charge and discharge speed, and strong high ...

ESTONIAN ENERGY POLICY IN THE CONTEXT OF ...

Aug 24, 2023 · Liliia Khorishko¹, Natalia Horlo², Yuliia Malovana³ Abstract. In today's political reality, the resilience and sustainability of Estonia's development depends on its ability to ...
