

# **European Industrial Energy Storage Lithium Batteries**

## Overview

---

What percentage of European battery energy storage systems are lithium ion?

By battery type, lithium-ion commanded 92% of the European battery energy storage system market share in 2024; flow batteries are projected to expand at a 16.66% CAGR through 2030.

Which country has the largest battery storage market in Europe?

Germany, Italy and the United Kingdom continue to lead the European battery storage market in 2025 and together account for almost 70 percent of newly installed annual capacity. Germany holds the largest market share with 27 percent, followed by Italy with 17 percent and the UK with 11 percent.

Is the European battery storage market ready for 2029?

Despite positive market developments, SolarPower Europe stresses that the European battery storage market needs to grow at an even faster rate to meet the rising demand for grid flexibility. A potential total volume of up to 400 GWh is projected for 2029 – an ambitious but necessary target for the energy transition.

How can European policymakers help the battery storage sector?

Recommendations  
How can European policymakers help the battery storage sector? Battery storage systems are essential for strengthening the EU's energy security and competitiveness by enhancing flexibility, providing ancillary services to secure the grid, maximising the use of renewable energy, and effectively dealing with energy price volatility.
