

Four Danish energy storage project investment companies

Overview

Does European energy have a battery storage project in Denmark?

European Energy breaks ground on battery storage in Denmark together with Kragerup Estate. Project to provide operational experience for European Energy in integration of battery solutions. Copenhagen, Denmark, 20th of January 2025 – European Energy has started on its first large-scale battery storage project.

Can CO₂ be geologically stored in Denmark?

The CO₂ can be geologically stored either in Denmark or abroad. “Carbon capture and storage is one of several tools we can use to reduce Denmark’s CO₂ emissions and move closer to our climate goals. For every tonne of CO₂ we remove from the atmosphere and store underground, we reduce Denmark’s climate impact.

What is European energy's new battery storage project?

This is done in collaboration with Kragerup Estate. This is the first battery storage project that European Energy has undertaken in Denmark, and it will provide valuable operational experience in integrating battery solutions with the grid for the company.

Why is the Kragerup project important for European energy?

The Kragerup project is essential for European Energy, enabling the company to manage increasing volumes of renewable energy generated in Denmark. With the installation of a state-of-the-art battery, European Energy is positioned to enhance the stability and resilience of the electricity grid.
