Overview

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

What is a mobile solar container?

The mobile solar container range redefines on-site power by harnessing the sun's energy in an efficient and reliable way to maximize the solar yield. Hybrid performance with a generator or an Energy Storage System makes the ZSC mobile solar containers as part of a microgrid solution.

How many installers does a solarcontainer need?

At least 3-4 installers and 1 crane operator are needed to put the Solarcontainer into operation within one day. How many households can one Solarcontainer supply with electricity?

.

What is a SWT solar container?

SWT solar container uses PV and battery to supply power to the load, and diesel generator as a backup power supply to supply power to the load when PV and battery are insufficient. Designed to provide flexible options that are configured according to your power needs. Scalable and reproducible, ensuring optimal performance and efficiency.
