

# French power station generator connection

## Overview

---

This connection procedure applies to: 1. The connection of a new generating facility or group of facilities with an installed capacity of 12 MW or more to a single point on the public electricity transmission.

What is a Q&A guide to electricity regulation in France?

A Q&A guide to electricity regulation in France. The Q&A gives a high-level overview of the domestic electricity market, including domestic electricity companies, electricity generation and renewable energy, transmission, distribution, supply and tax issues.

Who is responsible for electricity distribution in France?

Operating the electricity distribution systems is done either by Enedis or by local distribution companies, if they existed in 1946 or, overseas, by Electricité de France. Municipalities can, however, choose to handle the public service of electric distribution through a public company (régie), if it was already the case in 1946 (see Question 3).

How much electricity does France import?

In 2019, France imported 28.3 TWh of electricity. In 2018, France exported 84 TWh of electricity. 7. What are the main sources of electricity generation?

.

What type of power does France have?

France's installed electricity generation capacity is mainly made up of nuclear, hydroelectric and fossil-fired power plants, as well as renewable power plants (wind, solar photovoltaic, biomass). French power production continues to change in 2022 and 2023, driven by the growth in renewable energy sources.

## French power station generator connection
