Who is Japan Charge network?

Japan Charge Network Co., Ltd. specializes in providing solutions for electric vehicle charging networks, making it a key player in the development of charging infrastructure. The company is involved in electric vehicle development, which may suggest a focus on technologies related to electric vehicles.

Which city has more charging stations in Japan?

Koto City is the city with more charging stations in Japan. And Kochi is the place with less. The latest charge point added to our database of Japan was: Supercharger Kochi, Japan in Kochi (21/01/2022).

How does a charging station work?

As soon as an AGV or mobile robot moves to a charging station, the energy supply starts automatically in less than a second. This means that even short stops during the workflow can be used for intermediate battery charging with a high amount of charge. The charging station can also be approached omnidirectionally.
