

Fully enclosed solar panels on the roof

Overview

What is a rooftop solar system?

A rooftop solar system consists of solar photovoltaic (PV) panels mounted on the roof of a building. These panels absorb sunlight and convert it into electricity, reducing or even eliminating your dependence on traditional power sources.

What is a roof-mount solar system?

Here are a few considerations before putting your finger on one of them: A roof-mount solar system is a photovoltaic (PV) system that generates electricity through solar panels mounted on a rooftop. Owing to their easy installation and low maintenance, roof-mount solar panels are ideal for residential and commercial purposes.

Are in-roof solar panels right for Your House?

They integrate smoothly into your roof during construction or when you're replacing an old roof, avoiding the visual clutter of typical installations. Blending seamlessly with your roofline, in-roof solar panels can be a game-changer for your home. Here's why:.

How to choose a solar roof?

Solar rooftop panels are installed using solar mounts. Identifying the area for solar panel installation helps determine how many solar mounts you need. Also, while identifying the total rooftop area, you can specify the extent of shade-free area. Ascertain the endurance capacity of the roof, as the solar panels are bound to weigh heavy on it.
