

Generators of Toronto Power Station in Canada

Overview

What is the Toronto Power Generating Station?

The Toronto Power Generating Station is a landmark facility that significantly influenced the evolution of energy infrastructure in Toronto and the surrounding region. Built near Niagara Falls, it was the first large-scale power station in the area, heralding a new era of industrial progress.

Why was the Toronto Power Generating Station important?

The Toronto Power Generating Station, associated with development of hydro-electric power in Canada, was a significant large-scale engineering achievement in its time and was important in the development of business, industry and technology in Ontario and Canada.

Does Toronto have a generator?

Right: A generator. Images courtesy of the Niagara Falls (Ontario) Public Library. Designed to provide Toronto with now-defunct 25 cycle power, the Toronto Power Generating Station was equipped with a wheel pit 120-m (400-ft) long and 45-m (150-ft) deep with 11 turbines.

Who owns Toronto power generation station?

Owned by three Canadian businessmen, this company would be responsible for the construction of the Toronto Power Generation Station, the first wholly Canadian-owned hydroelectric facility in Niagara Falls.
