# Ghana Smart Photovoltaic Energy Storage Container 5MW

## Overview

---

What is the largest solar farm in Ghana?

This innovative system in addition to the already existing 50MWp land based solar farm is the largest farm so far in Ghana. The combined generation from 404MW hydro plant and 55MWp solar plants, further advances the region's renewable energy capabilities.

Which country has launched a 5MW floating solar PV plant?

Ghana has launched West Africa's largest 5MW floating solar PV plant on the Bui reservoir, integrating solar and hydro resources for energy generation. Ghana has launched 5 megawatts of West Africa's largest floating solar photovoltaic plant to date. Bui Power Authority (BPA) completed the project on the Bui reservoir.

Which country has launched 5 megawatts of West Africa's largest solar photovoltaic plant?

Ghana has launched 5 megawatts of West Africa's largest floating solar photovoltaic plant to date. Bui Power Authority (BPA) completed the project on the Bui reservoir. The project is part of a hybrid plant that uses solar and hydro resources to generate and supply power to the national grid.

Why is a 30mwh battery energy storage system installed?

Electricity generation from solar is intermittent and to ensure that the national grid system is not interrupted by the fluctuations from the solar farms, a state-of-the-art 30MWh Battery Energy Storage System (BESS) has been installed to provide backup power to mitigate the intermittencies associated with solar generation.
