

High voltage energy storage bms solution

Overview

What is a high-voltage battery management system (BMS)?

That's where high-voltage Battery Management Systems (BMS) come into play. A well-designed BMS is the key to unlocking battery longevity, maximizing usable power, and ensuring operational reliability.

What is a high voltage BMS?

Nuvation Energy's High-Voltage BMS provides cell- and stack-level control for battery stacks up to 1500 V DC. One Stack Switchgear unit manages each stack and connects it to the DC bus of the energy storage system.

How does the nuvation energy high voltage BMS work?

From kWh to MWh, the Nuvation Energy High-Voltage BMS manages up to 1500 V DC per battery stack and up to 16 stacks in parallel with the addition of a Multi Stack Controller. Connects and disconnects a battery stack to the DC bus of the ESS in response to requests from system controllers.

What are battery management systems (BMS)?

Battery Management Systems (BMS) are the key to the safe, reliable and efficient functioning of the lithium-ion batteries. Especially When use a high voltage bms.
