# How much does it cost to install solar panels on European roofs

## Overview

---

How much do solar panels cost in the UK?

The most common type of system is the 4kW solar system, which costs between £5,000 – £6,000. It can save the average household about £660 per year, provided that they have a decent number of sunlight hours and are installed on a south-facing roof. In 2025, the price of solar panels in the UK can vary depending on several factors.

How much does a solar PV system cost in the EU?

However, the cost can vary depending on a few factors, such as the size of the system, the type of solar panels, and where you live in the EU. On average, a residential solar PV system in the EU can cost anywhere between €4,000 and €10,000 for a standard 3 to 5 kW system, which is typically enough for an average household.

Should you install solar panels on your roof?

More and more people are deciding to install solar panels on their roofs. And for good reason: the cost of solar panels has been falling for years and the yields continue to rise. But what exactly are the costs of solar panels and what are the possible yields?

Why do solar energy costs vary across Europe?

Solar energy costs across Europe vary significantly based on multiple factors including location, system quality, and energy policies. 1.
