

# **How much is the energy battery cabinet at the Singapore site**

## Overview

---

What is a battery energy storage system?

Battery energy storage systems (ESS) provide critical frequency and stability support to power grids. As one of Asia's largest battery operators, our energy storage portfolio is well-positioned to support the evolving needs of power markets as they increase their uptake of renewable energy. The Sembcorp Energy Storage System was launched in 2023.

Will Singapore have 'giant batteries' to store 200MW of energy?

Singapore will achieve its target of having “giant batteries” to store at least 200MW of energy three years early. The 200MW system is currently being installed across two sites on Jurong Island – Banyan and Sakra. [Read more about it here.](#)

Will Singapore have 'giant batteries'?

Source: The Straits Times © SPH Media Limited. Permission required for reproduction. Singapore will achieve its target of having “giant batteries” to store at least 200MW of energy three years early. The 200MW system is currently being installed across two sites on Jurong Island – Banyan and Sakra.

How will a 200MW energy storage system work on Jurong Island?

The 200MW system is currently being installed across two sites on Jurong Island – Banyan and Sakra – spanning 2ha of land in total, which is equivalent to the size of four football fields. Energy storage systems can also quickly manage mismatches in electricity supply and demand to help stabilise the power grid.
