

How much is the price of solar container outdoor power in Chad

Overview

How much will Chad spend on solar power?

Chad plans to raise \$1.1 billion to add 886 MW of power capacity, the majority of which is expected to be solar. Chad is aiming to deploy 520 MW of new solar by the end of the decade. The target forms part of the country's national development plan, Chad Connection 2030, which launched earlier this year.

Will a solar PV plant be a 'pioneering project' in Chad?

The European Investment Bank (EIB) described the solar PV plant as a “pioneering project” that “will help liberalise the energy sector, and mobilise private investment in Chad.” It is calculated that the cost of electricity will be less than half the current cost of power following the project.

How does Chad generate electricity?

Chad currently generates electricity by consuming oil. With the declining cost of new solar generation plants, the Government of Chad and development partners have prioritized solar power throughout the country. Machinery and parts for electricity transmission and distribution are also in demand. Opportunities.

Does Chad have a solar sector?

Chad's solar sector is still in its infancy. According to figures from the International Renewable Energy Agency (IRENA), the country's cumulative solar capacity stood at 2 MW at the end of last year, the same figure reported since 2021.
