

How to apply for 5g solar container communication station service

Overview

What is 5G power & iEnergy?

Fully meet the requirements of rapid 5G deployment, smooth evolution, efficient energy saving, and intelligent O&M. Including: 5G power, hybrid power and iEnergy network energy management solution. 5G power: 5G power one-cabinet site and All-Pad site simplify base station infrastructure construction.

What is a 5G solar power platform?

Hybrid power: On the basis of 5G power platform, solar power is smoothly introduced. In areas with good grid, the solutions upgrade smoothly among grid, solar hybrid and pure solar power to achieve low-carbon and zero-carbon.

Can a container image run a 5G network element?

Container images are typically read-only, so any of us could download and run a 5G network element by just using that image (as well as a runtime configuration and optional storage, explained below).

What is 5G & talk?

Integrate the IoT, AI, Cloud computing, Big data, Edge computing and other new technologies, create the integration of services and capabilities, build a new 5G “And Talk”, and provide unlimited distance intercom, multimedia communication, visual scheduling of Video + location and other services.
