

# How to disable the battery cabinet protection system

## Overview

---

How do you connect a battery cabinet to a ups?

Each battery cabinet contains two battery connectors. The first battery cabinet is connected to the UPS using the cable supplied with the cabinet. Each additional extension battery cabinet is connected by attaching its cable to the previous cabinet. Refer to the figure on the next page.

How do I wire the Eaton Samsung Gen 3 battery cabinets?

Only one ground conductor is required in each conduit. Use this procedure to wire the Eaton Samsung Gen 3 Battery Cabinets to the UPS cabinet. To install wiring to connections: Verify the UPS system is turned off and all power sources are removed. Refer to the applicable UPS Installation and Operation manual for UPS operating procedures.

How do I protect my Eaton battery?

Consult Eaton for storage items, cycles and periods. Circuit breakers, such as MCCBs, should be installed between the battery system and power converters. To prevent battery damage from transient voltage surges, protective devices such as an SPD could be installed.

What is the difference between a ups and a battery cabinet?

The UPS is available in 50 or 60 Hz with various output power ratings while the battery cabinet is available with 16 battery modules. The table below depicts the system model numbers and the stored energy capacity of the system. The End of Discharge Voltage limit for each battery cabinet for all models is 400.8V DC. Table 3.
