

How to put the generator into the container

Overview

Do you need a container for a portable generator?

Whether you call it a box, shed, shelter, or enclosure, your generator needs to be protected and integrated into the environment around it. Here are some of the best reasons for building a container for your portable generator.

How do you connect a generator to a house?

All the generators have standard 120 V outlets. You just need to plugin three-wire cables into these outlets and connect them to the appliances you want to power. It is quite common to run these cables through open doors and windows, but you must take care to use heavy-duty outdoor-rated cables only.

What is container type diesel generator set?

Container type Diesel Generator Set Jet power supply container type generator set is design in accordance with ISO/TC104 standard size, rational construction, to make sure the generator set will not be damaged due to under high pressure in transport, and is suitable for ship transportation.

How do I add a generator?

It's also possible to add a generator directly from the config.yml file. The default one has an example of how to define one. Where `<id>` is the id of one of the existing generators. Which allows you to change a property of a generator. The generators drop items, which must also be defined. You can add an item using the command
