Huawei installs solar panels in Romania

Overview

How much solar capacity is installed in Romania?

Romania had 1.39 GW of solar capacity installed by the end of 2020, according to the latest statistics from the International Renewable Energy Agency. Are solar panels a smart long-term investment in Romania?

With the scheduled removal of the energy price cap on April 1, more Romanians are turning to solar energy to reduce expenses and secure their energy supply. Rising electricity tariffs have further accelerated interest in renewable solutions, particularly in the residential sector, where solar panels are becoming a smart long-term investment.

Will Romania expand its photovoltaic sector in 2025?

Romania is set for a significant expansion in the photovoltaic sector in 2025, driven by funding programs such as Casa Verde and RePower EU, the liberalization of energy prices, and a growing interest among Romanians in achieving energy independence.

What is Romania's energy storage requirement?

Minister of Energy Sebastian Burduja reportedly declared at a conference that Romania's storage requirement is 4,000MWh, and that half would be covered by BESS and half by pumped hydro energy storage (PHES) technology.
